The business case

The number of young people starting STEM studies in Spain decreases year after year

The business case

Only 13 out of 1,000
students finish STEM
Degrees in Spain every year

PISA 2012 results show poor levels in
science and mathematical competencies
for Spain

The business case

The STEM Professions are, however, the ones that will grow the most in the coming years

	2010	2020	Increase
STEM New Professions	8.290	9.472	14%
All New Professions	223.219	230.847	3%

Program Objectives

Increase number of young people (specially girls) who choose STEM studies

Generate positive image of IT sector as employer

Increase % of individuals who actually finish STEM studies (and reduce female abandon rate)
