Enhancing medical training in the metaverse

Enhancing Training while **Conserving** Limited Resources

➤ The metaverse meets kidney care

The Hype, The Importance, The Must

A person silhouette stands with arms outstretched in front of a globe. The globe is overlaid with a complex network of blue lines and nodes, representing a digital or global network. The background is a gradient of purple and blue with a starry pattern.

Lower Costs

Greater Flexibility

Experiment with new business models and strategies

Global Reach

Enhanced Customer Experiences

Leveling the Playing Field

Personalized Learning

**Rules to
keep in
mind**

**Be creative and
keep it simple**

**Start small
and focused**

**Engage with
early building
blocks**

An aerial photograph of a tropical island. The island is lush with green vegetation, including many palm trees. A small village with several white buildings and corrugated metal roofs is situated on the island. The water is a vibrant turquoise color, with a sandy beach visible. The sky is bright, and the overall scene is idyllic and serene.

The **metaverse** may be virtual,
but the impact will be real

When tech meets human ingenuity ... Preserving a rich culture

“It’s not that
we use
technology,
we live
technology”
