

When Money Moved..

Fintech : A short story of technology and trust.

Dr. Çaęla GÜL ŞENKARDEŞ

Where Does Money Live?

For thousands of years, money lived in metal.

Then it lived in paper.

Then it lived in banks.

Today, increasingly, it lives in software.

The most important financial migration in history.

When Money Moved

From Places to Platforms..

Money didn't disappear.. It moved

Technology changed where finance lives..

From Paper to Code..

Technology made the move **possible..**

The Five forces behind the shift..

Mobile

Put finance in everyone's hand.

Cloud

Built the infrastructure at scale.

AI

Made finance smarter and faster.

Blockchain

Redefined trust and ownership.

+ Mindshift

The real fintech revolution was never Technology..

ACCESS changes everything...

**Access to
Money**

Financial services for
everyone, everywhere.

**Access to
Markets**

Global opportunities
no longer out of reach.

**Access to
Opportunity**

Entrepreneurship.
Growth. Impact.

Technology was simply the tool.

Three Things We No Longer Do

And why finance had to change.

We no longer

Wait.

Carry cash.

Trust paper.

Yet most financial systems were built for exactly those things.

THE NEXT CHAPTER

When Money became *digital*

As fintech evolved, money itself began to transform.

New forms.

New rails.

New possibilities..

Central Bank
Digital Currencies
(CBDCs)

Stablecoins

Cryptocurrencies

Finance + Technology + Value of Access

From : the use of technology to improve, redesign, and sometimes completely reinvent financial services

To: fintech becoming finance itself

The most important financial migration in history.
